

# How to Reduce Stress with NLP?

## **WESTEND HYPNOSIS**

Kristyn Livermore, Director

# What is NLP?

NLP = Neuro-Linguistic Programming

# The Most Important Question in NLP is ...

Who's  
Responsibility  
is it to \_\_\_\_\_?

**VOTE**

**VOTE**

# Causes of Stress:

Lack of Control

Unclear Expectations

Interpersonal Conflict

Too Much or Too Little To Do

Feeling Unsupported and/or

Unappreciated

# #1 Cause of Stress

# Step 1: Know Your Outcome

Focus on what you want  
(not what you want to get rid of)

Our Senses Receive 1 Million Bits per Second\*\*  
We Process 50 Bits per Second\*\*

\*\*Encyclopedia Britannica

# Step 2: Level with Yourself

Interrupt yourself OUT of: Blaming, Placating,  
Computing, Distracting

# What to do with the Emotions?

Let them flow, pee it out - and then focus on what  
you really want

# How to forgive and let go?

# Step 3: Focus on the BIG Picture

What combo of values, attitudes and actions are most useful?

Get OUT of Your Head  
Be in External Reality, Take Action  
and Learn from it

# Step 4: Ride the Wave of Change

## Know when to Surrender

# Step 5: Genius Model

Fantasize what you want for your Future

# Embrace the Adventure

Learning is happening ALL the time!
